Flexible. Durable. Adaptable.

The world's smallest Micro Armor Fiber™ Optic Cable can conquer any application.

The TiniFiber® Difference

For the first time in over 20 years, the industry has an innovative alternative to conventional Aluminum Interlock Armor (AIA) – TiniFiber®. This 65% smaller, 75% lighter fiber optic cable gets its superior durability, flexibility and adaptability from its patented Micro Armor stainless steel coil, which is designed to protect the glass strands and bend radius.
